

## KENNETH MAHAR

I have been taking photos of building sites and architecture for over 30 years. Since my trip to Africa and Costa Rica, I became captivated by wild animals in their natural habitat and have continued to explore this along with my passion for abstract architecture.

For the past seven years I have been showing my work through invitational and juried galleries, corporate buildings in Silicon Valley and galleries in Public Buildings. In addition I exhibit at fine art festivals throughout the San Francisco Bay Area and the Sierra foothills. I open my own studio, as well as participate in other Open Studio tours in the SF Bay Area. My work has won many awards for architectural abstracts that highlight my unique eye for composition and light, making each piece a focal point.
